PROFESSIONAL SUMMARY

Senior Generalist Game Engineer with over 15 years of software development experience, including more than 8 years in the game industry, developing commercial, live-service, AA, and independent games.

Experienced in designing and implementing gameplay systems while contributing across multiple areas of game development, including UI, multiplayer, AI, tools, game architecture, and backend integration. Comfortable taking ownership of features throughout their complete lifecycle, from technical planning to implementation, testing, and release.

Proven experience leading engineering teams, performing code reviews, estimating development effort, mentoring programmers, and collaborating closely with designers, artists, QA, and production teams.

Passionate about creating maintainable systems, solving complex technical challenges, and building engaging player experiences.

CAREER HIGHLIGHTS

- 15+ years of professional software development experience.
- 8+ years of professional game development experience.
- Technical Lead experience on commercial game projects.
- Professional experience with both Unreal Engine and Unity.
- Contributed to live-service, multiplayer, AA, and independent titles.
- Experience across gameplay, UI, multiplayer, AI, backend integration, and game architecture.
- Designed, developed, and published an independent game from scratch.
- Bachelor's Degree in Computer Science.

CORE SKILLS

Programming

- C++
- C#
- TypeScript
- .NET

Game Development

- Gameplay Systems
- Multiplayer
- User Interface
- Artificial Intelligence
- Player Controllers
- Combat Systems
- Game State Management
- Save Systems
- Grid-Based Gameplay
- Editor & Development Tools
- Performance Optimization
- Debugging & Profiling

Engines

- Unreal Engine 4
- Unreal Engine 5
- Unity
- Proprietary Engines

Leadership

- Technical Leadership
- Feature Ownership
- Code Reviews
- Task Estimation
- Team Mentoring
- Cross-disciplinary Collaboration

Tools

- Visual Studio
- Perforce
- Git

- MongoDB
 - Others
-

PROFESSIONAL EXPERIENCE

Trick Studios

Senior Game Engineer

March 2025 – Present

Marvel Strike Force

- Develop gameplay, UI, and backend-related features for a live-service title using Unity.
- Own features throughout their development lifecycle, from estimation and technical planning to implementation and delivery.
- Participate in code reviews and contribute to maintaining high engineering standards.
- Collaborate closely with designers, artists, QA, backend engineers, and production teams.
- Contribute to both client-side and server-side development.

Technologies: Unity, C#, TypeScript, MongoDB, Perforce

Seedify

Senior Gameplay Engineer

May 2024 – February 2025

Seedworld

- Implemented gameplay systems for a large-scale multiplayer metaverse project using Unreal Engine 5.
- Developed the game's settings system and team management systems.
- Contributed to networking and UI-related gameplay features.
- Collaborated with designers and engineers to implement gameplay mechanics across multiple game modes.

Technologies: Unreal Engine 5.3, C++, Perforce

Nimble Giant Entertainment

Tech Lead / Senior Game Developer

January 2022 – May 2024

Unannounced Project

- Led gameplay engineering efforts on multiple RTS and tactical strategy game prototypes.
- Coordinated programmers, planned development tasks, performed code reviews, and supported technical decision-making.
- Implemented gameplay, AI, and UI systems while working closely with multidisciplinary teams.

Star Trek Infinite (Paradox Interactive)

- Implemented gameplay features using the studio's proprietary C++ engine.
- Contributed to multiple gameplay systems throughout development.
- Participated in the implementation of the Quest Tree system, one of the game's most positively received features.
- Contributed to modifications of gameplay winning conditions and post-release support.
- Worked closely with designers to iterate on gameplay features.

Technologies: Proprietary Engine, C++, GitLab

The Multiplayer Group

Senior Game Developer

September 2022 – May 2023

Client: DPS Games

Project: Tomorrow Falls

- Developed gameplay and UI features using Unreal Engine.
- Collaborated with designers and engineers during gameplay feature development.
- Contributed to gameplay implementation before the project's cancellation.

Technologies: Unreal Engine 4, C++, Perforce

Collider Craftworks

Game Developer

September 2021 – December 2021

- Developed gameplay systems for an unannounced Unreal Engine project.
 - Collaborated within a multidisciplinary development team.
-

Globant

Game Developer / Technical Lead

May 2019 – August 2021

Worked across multiple international game development projects for globally recognized clients.

Meta (Facebook)

- Served as Technical Lead for a VR experience targeting Oculus Quest, Quest 2, and Rift.
- Led the engineering team and coordinated development activities.
- Defined technical architecture and participated in planning and task allocation.
- Worked closely with art and design teams throughout development.
- Contributed to a major refactor that significantly improved loading times.

Warner Bros.

- Worked as a full-stack game developer on a tactical strategy title.
- Developed gameplay, UI, and backend features using Unity.

Qualcomm

- Implemented audio-related gameplay systems in Unreal Engine.

InContext Solutions

- Developed client-side features using Unity.
- Implemented backend services and new product functionality.
- Contributed to technical leadership and feature planning.

Technologies: Unity, Unreal Engine, C#, TypeScript, Perforce, Git

Independent Game Development

Balanced Dungeons

Designer • Programmer • Solo Developer

Designed, developed, and published a complete puzzle game from scratch.

Responsible for every aspect of development, including:

- Game design
- Gameplay programming
- Puzzle and level design
- Enemy behaviors
- UI
- Animation systems
- Audio integration
- Save systems
- Game balancing
- Testing
- Publishing on itch.io

The project also includes a public development blog documenting design decisions, technical challenges, and lessons learned throughout development.

Parrotwood

Lead Developer

- Developed multiple gameplay prototypes using Unity.
 - Explored gameplay mechanics, systems architecture, and rapid prototyping.
 - Participated in several game jams and experimental projects.
-

Previous Software Engineering Experience

Hexacta

Software Developer → Software Architect

2011 – 2018

Progressed from Junior Developer to Software Architect while working on large-scale enterprise applications for international financial clients.

Worked with technologies including .NET, C#, Angular, TypeScript, SQL Server, WPF, Silverlight, HTML, CSS, and Node.js.

EDUCATION

Bachelor of Computer Science

Universidad Nacional del Sur

Graduated in October 2016

ADDITIONAL EDUCATION

- Game Design – Escuela de Game Design América Latina
 - Business of Games and Entrepreneurship – Michigan State University (Coursera)
 - Gamification Design – Iversity
 - Neuroscience Applied to Innovation – Universidad Nacional del Sur
-

LANGUAGES

- Spanish — Native
- English — Full Professional Proficiency
